HKDSE: Biology (5**), Physics (5**), English (5*), Chemistry (5*), Maths (5), Chinese (5)

Vetted Tutor

Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

Tutoring Experience

I began my tutoring journey during my university days, mainly focusing on underclassmen struggling in the realms of Biology and Physics. Over time, I expanded my horizon by mentoring IB students, ensuring they're adept not only in content but also in the intricacies of the exams. I've maintained a record of 90% of my students scoring 6 or higher in their HL exams. Additionally, I've worked as an assistant in summer camps, introducing young minds to the wonders of science through experiments and hands-on activities. My approach to teaching is holistic, emphasizing both theoretical understanding and practical application.

Tutoring Approach

For me, teaching is an art. My first aim is to break the ice; making students comfortable is crucial to facilitate efficient learning. Next, I delve into the intricacies of the subject, weaving a narrative that connects topics and ensures retention. I incorporate a plethora of teaching aids - from animated videos to hands-on experiments - to cater to various learning styles. Feedback sessions are a staple in my routine, allowing me to understand the students' perspective, any hurdles they might be facing, and fine-tune my approach accordingly. I foster an environment where questions are encouraged, ensuring complete clarity and fostering a genuine curiosity about the subjects.
